Pendant Lighting Luminaire

Style P Series features a soft and modern design language with its semi-circular edge profile, distinguishing it from standard linear forms. Its curved profile transitions create a smoother and more decorative appearance while providing comfortable illumination with uniform light distribution. With its aluminum body structure and clean design details, Style P adds a contemporary character to architectural projects. Thanks to its suspended mounting structure, it stands out as a strong design element in offices, commercial and social spaces.

Offering different color temperature and control options, the Style-P Series adapts to project-specific lighting scenarios while combining functional and aesthetic lighting solutions.
