

BLACKSTAR

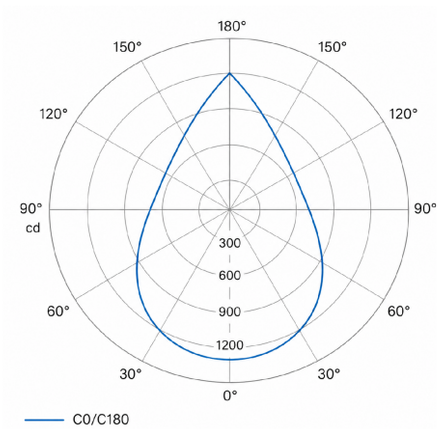

02179

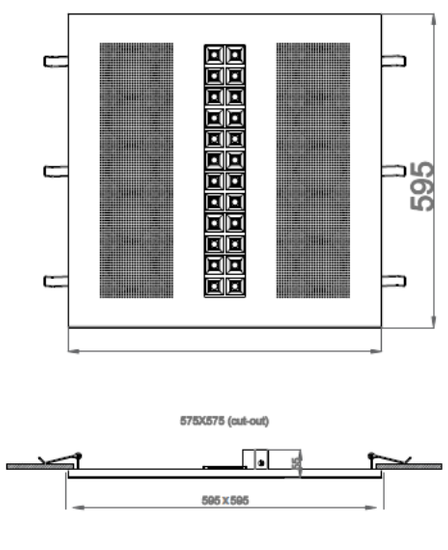

Glare-Controlled Office Lighting Fixture

Blackstar is an architectural general lighting solution that prioritizes visual comfort with its central reflector optical structure and special perforated sheet metal design. Thanks to its dark optical reflector system, it provides low glare, offering comfortable and controlled lighting in workspaces. The combination of the central light channel and the perforated metal details on the side surfaces gives the product a unique character that sets it apart from classic panel luminaires. Its slim body structure allows for easy use in applications with low ceiling clearance.

Compatible with standard suspended ceiling systems, Blackstar combines aesthetic appearance with high visual comfort in offices, educational buildings, healthcare facilities, and commercial spaces.
