Recessed Architectural Wallwasher Lighting Fixture

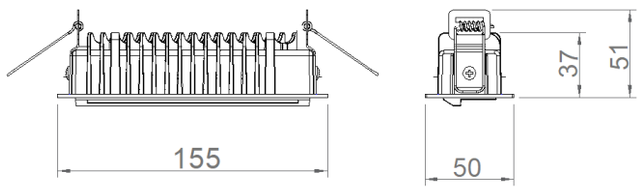

Target is a recessed wallwasher luminaire developed to illuminate wall surfaces homogeneously and controllably. Its slim and linear form highlights architectural details. By directing light evenly across the surface, it adds depth and an aesthetic appearance to the space.

Thanks to its deep reflector structure, it conceals the light source, offering a comfortable lighting experience with its low glare. Its minimalist design, integrated with the ceiling surface thanks to its flush mounting, allows only the illuminated surface to stand out, giving modern architectural projects a simple and elegant character.

It offers solutions for corridors, offices, hotels, shops, museums, galleries, and decorative wall applications. It emphasizes vertical surfaces with its wallwashing effect.
