Adjustable Emergency IP65 Projector

Cicala-P is an emergency floodlight that safely illuminates large areas during power outages. Its dual LED headlights, adjustable in direction (180°), allow for directional control. SMD Power LED technology and a 30,000-hour LED lifespan ensure long-lasting use. It automatically activates in case of power outages or low voltage. Thanks to its built-in lead-acid battery, it provides up to 3 hours of uninterrupted lighting in emergency situations.

A green LED charge indicator, test button, overcharge and discharge protection, and a constant voltage current-controlled charging circuit enhance maintenance and operational safety. Its ABS housing and surface-mountable design make it durable, practical, and reliable.
