

since | 1982

Founded in 1982, Ikizler Lighting continues its sustainable growth vision in investing in new technologies and people. Located both in Istanbul and Sakarya over 10.000 square meter production capacity, Ikizler focuses on production and product development in energy efficient LED lighting systems.

Investments in LED product development and production technologies focus on improving luminaire quality, increasing energy efficiency and light efficacy. Ikizler designs and develops luminaires using optical simulation softwares and performs lighting measurements and luminaire tests.

Certified by many internationally recognized institutes including ENEC, CE, Turkish Standards Institution, and the Russian(GOST-R) & Ukrainian(UKR CEPRO) Institutes, Ikizler invests in ROHS-compliant, quality products and processes that protect the environment while providing globally sustainable solutions. In addition to ISO 9001:2008, Ikizler holds ISO 14001 for effective environment management, and OHSAS 18001 for occupational health and safety management systems.

Ikizler Lighting's new product, U-Line Pendant has won "2015 Red Dot Design Award" accepted as the most prestigious design award in the World.

U-Line

U-Line

Housing is made of eloxal plated aluminum profile with metal sheet end caps. Electrostatic powder paint of black, gray or white are provided as standard colors, with different color options available if requested. Uv-ray protected, acrylic (PMMA) diffuser is used as optics, with homogeneous, direct - indirect light output.

High efficiency LED driver secures low energy loss. Usage of halogen-free cable ensures extra safety. LED module with 50.000h life time and CRI>80 used.

Steel wire suspension mechanism with adjustable height is used for pendant mounting installation. 3000K, 4000K, 5000K, 6500K CCT options are provided as standard, with RGB options available upon request.

DALI dimming options available.

Ikizler Lighting's new product, U-Line Pendant has won "2015 Red Dot Design Award" accepted as the most prestigious design award in the World.

U-Line stands out with its slim & unique design and environment friendly structure made of aluminum profile suitable for recycling. LED is used as light source to benefit from energy savings and long lifetime. The modular structure can be utilized to come up with various designs to interact with designs of environments used such as offices, meeting rooms and shopping centers. U-line uses the newest LED technology with efficacy of 115 lumen/watt rating.
